DISINFECTING, CLEANING & SANITIZING

We've worked hard to keep our facilities clean and ready for guests for 60 years, but we've taken many additional extra actions in the light of the coronavirus threat.*

On the doors to our public areas (Front Office, Trading Post, Coffee House, Bathhouses and more), you'll find hand sanitizer dispensers mounted close to the door handles.

Please utilize them before opening the door.

* For all buildings, twice daily, we're treating all surfaces typically touched by guests with a bleach-based disinfecting solution (prepared using CDC guidelines)

- * Outside door handles and pushbars
- * Inside door handles and pushbars
- * Toilet and urinal handles
- * Faucet handles
- * Shower handles

* Countertops (reservations, retail)

* We've asked the Housekeeping Contractor for our Rental Villas to disinfect door handles, bathroom fixtures and countertops when they prepare a rental villa for a new guest.

* We have select bathhouses open to ensure the cleanest facilities

We ask that you wipe down surfaces prior to use as there is no way to ensure they have been cleaned between each use.
